207. Course Schedule

Solved

Medium Topics Hint

There are a total of `numCourses` courses you have to take, labeled from `0` to `numCourses - 1`. You are given an array `prerequisites` where `prerequisites[i] = [a_i, b_i]` indicates that you **must** take course `b_i` first if you want to take course `a_i`.

- For example, the pair `[0, 1]`, indicates that to take course `0` you have to first take course `1`.

Return `true` if you can finish all courses. Otherwise, return `false`.

Example 1:

```
Input: numCourses = 2, prerequisites = [[1,0]]
Output: true
Explanation: There are a total of 2 courses to take.
To take course 1 you should have finished course 0. So it is possible.
```

Example 2:

18.4K 392 81 Online

Code

Java Auto

```
19                  if(gri
20                  {
21                      nu
22                      if
23                      if
24                  }
25              }
26
27          }
28          for (int i=0;i
29          {
30              if(nums[i]
31          }
32          return true;
33
```
